

Pham Thanh Tri

Software Engineer

 (+84) 398694435  phamthanhtri0712@gmail.com  <https://github.com/phamthanhtri>  Thu Duc, Ho Chi Minh City

SKILLS

Programming Languages:	Java, JavaScript, TypeScript
Backend:	Spring Boot, Spring Cloud, Spring Security, Spring Data JPA, RESTful API, Microservices, Node.js, Express.js, NestJS, JWT, OAuth2
Frontend:	React.js, Redux Toolkit, Tailwind CSS, Shadcn, HTML5, CSS3
Databases & Messaging:	MySQL/MariaDB, PostgreSQL/pgvector, MongoDB, Redis, Kafka, WebSocket, STOMP
DevOps, AI & Tools:	Docker, Git/GitHub, GitHub Actions, AWS EC2, Nginx, Postman, Linux, Spring AI, RAG, Cloudinary, VNPAY, MoMo, Jira, Figma

PROJECTS

Alpha Cinema - Ticket Management & Cinema Operation System	Feb 2026 - May 2026
Team Leader (Team Size: 3) - https://github.com/phamthanhtri/alpha_cinema	
Tech Stack: Java, Spring Boot, Spring Cloud, Eureka, API Gateway, Config Server, React, TypeScript, Redux Toolkit, Tailwind CSS, MySQL, MongoDB, Redis, Kafka, PostgreSQL/pgvector, Spring AI, Gemini, VNPAY, MoMo, Cloudinary, Docker, WebSocket.	
Responsibilities:	
- Designed and initialized the microservices architecture using Spring Boot, Spring Cloud, Eureka, API Gateway, and Config Server, while setting up the React/TypeScript frontend structure and Jira Agile workflow for a 3-member team. - Built a high-concurrency online ticketing module with Redis-based seat locking, short-lived checkout sessions, and STOMP WebSocket seat synchronization, validating the workflow with k6 under 500 simulated concurrent users, 6,022 HTTP requests, and 641 booking attempts with no double-booking incidents. - Implemented an asynchronous payment workflow for VNPAY and MoMo using the Strategy Pattern and Kafka events to coordinate payment callbacks, order fulfillment, loyalty updates, and real-time customer notifications without blocking the checkout flow. - Integrated a RAG-based AI chatbot using Spring AI, Gemini, and PostgreSQL/pgvector, enabling customers to query movie schedules, seat availability, ticket prices, promotions, policies, and order information through documents retrieval and tool calling. - Developed role-based dashboards for Cinema Managers and System Admins, supporting multi-branch management, revenue analytics, dynamic Excel exports, employee/user administration, and Cloudinary-based media management.	

HotelLink - Hotel Booking & Management System	Dec 2025 - Feb 2026
Personal Project Full-stack Developer - https://github.com/phamthanhtri/hotel_link	
Tech Stack: Java, Spring Boot, React, MariaDB, Nginx, Docker, GitHub Actions, AWS EC2, Redux Toolkit, Tailwind CSS, VNPAY, Momo, Cloudinary, OAuth2.	
Responsibilities:	
Backend Development: Designed robust RESTful APIs with Spring Boot, implementing a Layered Architecture and enforcing strict data security with Spring Security (JWT/OAuth2). Frontend Development: Built an interactive, responsive user interface using React and Tailwind CSS, utilizing Redux Toolkit for centralized state management across multiple user roles (Admin, Staff, Customer). System Integration: Integrated essential third-party services including VNPAY/Momo for seamless transactions, Cloudinary for media management, and SMTP for automated email notifications. DevOps & Infrastructure: Streamlined the release process by containerizing the ecosystem with Docker, automating builds via GitHub Actions CI/CD, and deploying to AWS EC2, utilizing Nginx as a high-performance web server for optimal static asset delivery and SPA routing.	

EDUCATION

Industrial University of Ho Chi Minh City	Oct 2022 - Present
Major: Software Engineering	
GPA: 3.46 / 4.0 (Received 4 academic scholarships based on semester GPA)	

CERTIFICATIONS

TOEIC 915 (Reading and Listening)	Aug 2025
